2. Between 8:30 p.m. and 9 p.m. on 1 September, signal cartridges were fired south-
west of Pasewalk. Source expressed the belief that the Franzfelde airfield on
the road to Papendorf (N 54/Q 16) was temporarily occupied. On the same day, a
U-2 biplane, which had come from the direction of the Franzfelde airfield, circled
over Pasewalk.   25X1

_____ Comment. The observations by the three sources are believed to be
connected with the command post exercise, which presumably started in this area
about 28 August. The advanced airfields for liaison airplanes observed near
Angermuende and Pasewalk tend to indicate that two higher headquarters had
been stationed there during the exercise. Headquarters units of the Third Gds
Mecz Army were detrained in Angermuende and headquarters units of the Third Shock
Army, in Pasewalk. Another source observed a bivouac in the Caselow area, 10 km

25X1A
southeast of Pasewalk. _____ The motor vehicles observed in
this area by source of paragraph 3 belong to the Third Shock Army.
